FROM AUTUMN AND SPRING SOIL PREPARATION  
TO POST-HARVEST STUBBLE WORKING, INCLUDING  
FIELD AERATION AND REGENERATION AT THE START OF WINTER,  
ACTISOL HAS BEEN YOUR SOIL CAPITAL PARTNER FOR OVER 50 YEARS.

### ACTISOL SUPPORTS YOU IN ALL YOUR SOIL PREPARATION WORK

Its unrivalled versatility allows you to manage various types of work (scalping, loosening, or cracking).

### A COMPREHENSIVE LINE TO EQUIP EACH POWER CLASS

to best improve 'Soil Capital' while saving fuel.

### HEAVY DUTY WEAR PARTS

### EASY MAINTENANCE FOR ROBUST EQUIPMENT

## ROLL KROP » Managed plant cover

ROLL KROP IS A COST-EFFECTIVE RESPONSE FOR FARMERS CONCERNED ABOUT AGRONOMIC TRAJECTORIES. ITS MECHANICAL ACTION IS AN ALTERNATIVE TO THE USE OF PLANT PROTECTION PRODUCTS.

### PRODUCT CHARACTERISTICS

- › TWIN-BEAM FRAME: 100 x 100 mm box sectioned
- › BLADE ROLLER Ø 600
- › BLADES: 300 mm
- › WORKING WIDTH: 3, 4, 5, 6 m
- › TRANSPORT WIDTH: 3.20 m or folding 2.80 m
- › 3-POINT MODULAR HITCH FRONT/REAR

RK 300 / 2 chevron	1 500 kg
RK 400 / 2 chevron	2 030 kg
RK 300 / 1 chevron	1 110 kg
RK 400 / 1 chevron	1 340 kg
RK 380 / 1 chevron	1 470 kg
RK 440 / 1 chevron	1 580 kg
RK 500 / 1 chevron	1 690 kg
RK 620 / 1 chevron	1 910 kg

#### DOUBLE CHEVRON FRAME GEOMETRY

The Roll Krop double chevron structure destroys plant cover and returns it to the soil through decomposition.

### A+++

- NOURISH AND PROTECT THE SOIL
- ALTERNATIVE TO PLANT PROTECTION PRODUCTS

#### VERSATILE TOOL

Whether single or double roller, its design allows it to be combined with other tillage tools and no-till seeders. In addition to destroying catch crops, it also destroys certain harvested crop residues.

#### HARDENED STEEL BLADES

### TECHNICAL FOCUS

#### LIGHTWEIGHT FOR HIGH EFFICIENCY

Spiral rotation is very effective for plant laceration. Its strength does not come from its weight but its structure, allowing you to work with a lightweight tool to best maintain proper soil structure.

#### EFFECTIVE ON ALL TYPES OF PLANT COVER

The Roll Krop comprises rollers assembled in a staggered pattern. The precise angle of the treated steel blades, combined with the spiral rotation, lacerates the plant. The rollers leave an X-shaped imprint touching the plants twice, particularly double rollers. Effectiveness is, therefore, guaranteed even on very woody plants.

#### FOLDING MODEL

#### HITCHING

To make it easier to hitch the tool to the tractor, Roll Krop drawbar hitches are removable.

To switch from rear to front hitching, simply remove one pin from each hitch coupler and tilt the 3-point hitch
